# Dermapen™

Skin condition treatments

Quality skin needling pen that promotes scar less healing & natural collagen reproduction

10% introductory discount

**Dermapen**  
elements

Book Your Free Consultation!

# What is Dermapen?

Dermapen promotes scar less healing and natural collagen reproduction, but without the side effects and downtime. It has a superior effect on collagen and elastin rejuvenation as it is safer and more effective in piercing the skin than traditional skin needling rollers, because of its unique vertical needling technology.

## How does the Dermapen treatment work?

Dermapen uses micro needles that deliver effortless and effective skin needling. The exclusive needle system is nickel and titanium free in an individual spring loaded cartridge which allows for procedure depth versatility to customise every treatment area and concern.

The oscillating pen harmoniously vibrates and glides over the skin providing the most efficient control, safety and comfort as possible. With 12 needles in each tip and a motor which is capable of 180 Hz, the Dermapen produces around 1300 micro channels per second.

## Are Dermapen treatments painful?

The treatment is very comfortable and requires no topical anesthetics, unlike the derma roller, or other skin preparation. Patients will experience limited down-time.

## When can I expect to see results from Dermapen treatments?

The number of treatments depends on genetics, diet, aftercare, the severity and how long the person has had the problem. Dermapen treatments will become a normal part of your facial treatment plan for skin tightening or it will be a treatment plan for the specific condition.

## Is Dermapen safe, and are there any side effects?

Dermapen is a safe and effective treatment for most skin types. There are generally no side effects with the treatment.

# Dermapen is used to treat:

## Ageing, Fine Lines, Wrinkles & Collagen Therapy

Each layer of skin is affected by ageing, genetics and the environment. Lines and wrinkles begin to show when thinner skin is no longer filled with collagen and fat cells.

Wrinkles Causes: age, exposure to harmful substances, artificial tanning, ultraviolet light, poor diet and smoking.

## Acne, Breakouts, Problematic & Seborrhoeic

Acne, breakouts, problematic skins and seborrhoeic are skin conditions characterized by red pimples on the skin, due to inflamed or infected sebaceous glands.

## Acne, Surgical & Trauma Scars

A scar is a mark left on the skin or within body tissue where a wound, burn, or sore has not healed completely and fibrous connective tissue has developed.

## Enlarged & Dilated Pores

There are three main causes of enlarged / dilated pores; oily skin, age and sex. Our bodies produce sebum, an oily substance we secrete to make the skin waterproof and keep it from drying out.

## Hypopigmentation & Vitiligo

Hypopigmentation & Vitiligo is the absence of normal amounts of melanin (chemical that gives skin its colour) caused by disease, injury, burns, infections, pimples, blisters, scrapes and any injuries that result in scarring can all lead to skin discolouration.

## Keratosis Pilaris & Milia

Keratosis Pilaris is the production of excess keratin that becomes embedded in the follicle.

Milia are small raised keratin filled cysts that sit under epidermal surface, especially around peri-oral and cheek areas.

## Rosacea & Telangiectasia

Rosacea is a condition in which certain facial blood vessels enlarge, giving the cheeks and nose a flushed appearance.

Telangiectasia is a condition characterized by dilatation of the capillaries causing them to appear as small red/purple clusters, often spiderly in appearance.

## Stretch Marks (Striae)

A Striae (Stretch Marks) is a result from internal dermal tearing. Stretch marks can occur during pregnancy, weight gain and weight loss. They can also occur when using topical corticosteroids.

## Alopecia & Hair Regeneration

Alopecia is the partial or complete absence of hair from areas of the body where it normally grows.

## Ageing, Fine Lines, Wrinkles & Collagen Therapy

## Acne, Surgical & Trauma Scars

## Enlarged & Dilated Pores

## Milia

## Rosacea

## Stretch Marks (Striae)
